DF-NC-FB

NON-CRASH RATED FIXED BOLLARD

PRODUCT OVERVIEW

The DF-NC-FB Fixed Bollard is a dependable solution designed for access control, vehicle guidance, and pedestrian safety in non-high-security environments. While it is not crash-rated, the bollard is manufactured from high-grade steel, ensuring long-term durability, corrosion resistance, and a refined, modern appearance. The fixed installation provides clear physical and visual demarcation, helping to manage traffic flow and restrict unauthorized vehicle movement. Suitable for light to moderate vehicle restraint, the DF-NCR-FB is ideal for commercial complexes, pedestrian zones, public spaces, and private driveways where safety, order, and aesthetics are equally important.

APPLICATIONS

- Government Installations & Embassies
- Airports, Ports & High-Security Facilities
- Retail fronts and shopping areas
- Parking areas and driveways
- Data Centres & Critical Infrastructure
- Pedestrian walkways and public spaces
- Hotels, hospitals and institutional campuses

KEY TECHNICAL PARAMETERS

PARAMETER	SPECIFICATION
Product Name	DF-NC-FB
Bollard OD	168mm to 219mm
Height Above Ground	1000 mm
Type	Chemical Anchor bolted with base plate
Bollard Thickness	10 mm
Finishes Available	Standard Supply - Galvanized with customized painted finish incorporating two reflective bands for enhanced visibility. optional - The bollard can also be provided with a Grade 316 stainless steel aesthetic sleeve with dual bands
