LIFT HINGED FLOOD GATE:

DF-LH-FG

Description

- Lift-Hinged flood gates utilize a unique 'raise-swing-lower' mechanism and do not require recessed ground channels, raised ground beams or ramps.
- The widest flood gates can be operated by one person using the smooth winding lift action and the single point locking mechanism.
- They are designed for extreme weather durability to give a lifetime of service and with EPDM gaskets that reform even after prolonged periods of compression.

DYNOFORCE

DF-LH-FG

- The lightweight aluminium construction also provides a far higher level of operator safety than heavy steel gates. Due to their unique design, the gates are able to open a full 180°, either with or against the direction of flooding. These flood gates are available as single or double leaf, or integrated with a stop-log system for wide entrances. Our gates are suitable for use in unmanned locations, are fully lockable and come complete with anti-theft and vandal resistant features.

DF-LH-FG

Installation

- For advice about installation of this product please contact our Sales office.

Dimensions

- If dimensions are critical, please contact sales to confirm.

Uses

- Flood gates can be used on dead level thresholds for vehicle / disabled access. Single person operation.
